

MAT 488 Report #2 Due February 24

Write a report that answers the questions to Chapter 2, number 6 of the text.

It is about personal computers.

Use the Five Step Method outlined in Chapter 1.

The report should be between 3 and 6 pages long. (double spaced).

Make sure to proofread the report.

The report will be graded out of 50 points:

20 points for accuracy of the calculations.

20 points for correct interpretations and explanations.

10 points for style (lack of errors, proper English, etc.)

Be sure to round consistently and to a reasonable precision.

Reports should be typed and explanations written in proper English.

Graphs and tables must be computer generated and labeled clearly.

Answers to questions must be included in the body of the report not just highlighted or referenced to computer output.

The report must be one file, but you may submit other files that show complex calculations (Spreadsheets, CAS work sheets, software programs) as additional files.

You do not need to derive formulas or theorems but you should briefly explain your methodology.

Submit via BB9. The file must be a docx or pdf. Name the file <your last name>P1.docx or .pdf

Late submissions will be SEVERELY penalized!
